

Kauai County Discussion Draft General Plan
TARGETED APPROACH TO REVIEWING & COMMENTING

The *Kauai County Discussion Draft General Plan* is 357 pages long. Because most people who would like to review the document and provide input to the County will find this a lot of material to digest, we are suggesting you target those areas of greatest interest. This table is intended to provide a quick and easy guide to finding those areas of interest. Additionally, the table provides some key elements to keep in mind and/or questions to ask when reviewing each section. And, because we are encouraging an integrated approach to assessing what is in the document, other components of the plan that are relevant to each part of the plan have also been provided. We hope you will review your areas of interest with a critical eye, document any suggestions you might have, and provide them to Kauai County as part of the public record in the hopes they will make it into the Draft General Plan that will be provided to the Planning Commission.
